Description : Information about the business activities of the issuer

Tiger Ltd. is a private investment company that will invest in other companies that each have an alternative investment specialty. Every Tiger Share that is sold it is backed by no less than 150% of audited assets.

The following firms will be utilized on an opportunistic level depending on their ability to provide above market yields:

- *Best Fund of Funds*
- *Investment in funds gives a great diversification in a specified asset class, which thereby decreases the risk.*
- *An investment in a fund of funds then allows investors to achieve a even broader diversification and an appropriate asset allocation with investments in a variety of fund categories that are all wrapped up into one fund.*
- *As these funds are easily measured in regards to return and risk, the Company has chosen the best Fund of Funds as an important investment asset to realize the Investment Strategy.*
- *By choosing the best of the Fund of Funds, this also gives a great diversification in industries, and thereby makes the investment less depending changes in industries, while still obtaining attractive return.*
- *Pharmaceuticals ETF*
- *Investing in pharmaceuticals is a challenge that requires a great knowledge to the industry. In addition, it also gives a high possible return, as the demand for the products in general a expected to increase substantial over the coming decades.*
- *As investment in this industry is very challenging – but highly rewarding – the Company has decided to invest in this investment asset via Exchange-Traded Funds (ETF's).*
- *The benefit from using an EFT is that it's a marketable security. Unlike mutual funds, an ETF trades like a common stock on a stock exchange.*
- *ETFs experience price changes throughout the day as they are bought and sold. ETFs typically have higher daily liquidity and lower fees than mutual fund shares, making them an attractive alternative for individual investors.*

- *By adding this investment asset to the Investment Strategy, a significant higher return is anticipated.*
- *Government Bonds*
- *Government Bonds are normally a very secure investment asset. They are debt obligations issued by the government of a Country, where the revenues from the bonds are generally used for financing government projects or activities.*
- *The fact that the Country has the obligation for the repayment of the debt makes this the most secure investment asset set aside cash.*
- *As this investment asset has a very low level of risk, the returns are also in the low end. However, as several emerging countries are using this to funding their way to become industrial countries, that particular market represents some good opportunities, where the return are higher than when investing in government bonds from Western Countries. The risk is considered higher, but as many emerging countries issues their government bonds in Western Currencies like USD and EUR, the only risk is based on whether the country as maturity can repay the obligations.*
- *With careful analysis, the Company believes itself to be very efficient in identifying several good investment objectives.*
- *Top 100 Nasdaq Shares*
- *Shares are normally one of the most risky investment assets, and they are normally very depending on the general economical state of the world.*
- *The Company has chosen to utilize the high return on the investment asset, though reducing the risk via investing in the Nasdaq-100 Index.*
- *The Nasdaq-100 Index includes 100 of the largest domestic and international non-financial companies listed on The Nasdaq Stock Market based on market capitalization. The Index reflects companies across major industry groups including computer hardware and software, telecommunications, retail/wholesale trade and biotechnology. It does not contain securities of financial companies including investment companies.*
- *By investing in this index, the Company has obtained great spread of the risk and simultaneously taking advantage of the higher return.*

The funds will be allocated based on opportunity rather than a strict formula
